### **NAME**

ares\_free\_data - Free data allocated by several c-ares functions

### **SYNOPSIS**

#include <ares.h>

void ares free data(void \*dataptr)

cc file.c -lcares

#### DESCRIPTION

The ares\_free\_data(3) function frees one or more data structures allocated and returned by several c-ares functions. Specifically the data returned by the following list of functions must be deallocated using this function.

## ares\_get\_servers(3)

When used to free the data returned by ares\_get\_servers(3) this will free the whole linked list of ares\_addr\_node structures returned by ares\_get\_servers(3).

### ares\_parse\_srv\_reply(3)

When used to free the data returned by ares\_parse\_srv\_reply(3) this will free the whole linked list of ares\_srv\_reply structures returned by ares\_parse\_srv\_reply(3), along with any additional storage associated with those structures.

#### ares\_parse\_mx\_reply(3)

When used to free the data returned by ares\_parse\_mx\_reply(3) this will free the whole linked list of ares\_mx\_reply structures returned by ares\_parse\_mx\_reply(3), along with any additional storage associated with those structures.

## ares\_parse\_txt\_reply(3)

When used to free the data returned by ares\_parse\_txt\_reply(3) this will free the whole linked list of ares\_txt\_reply structures returned by ares\_parse\_txt\_reply(3), along with any additional storage associated with those structures.

### ares\_parse\_soa\_reply(3)

When used to free the data returned by ares\_parse\_soa\_reply(3) this will free the ares\_soa\_reply structure, along with any additional storage associated with those structure.

## **RETURN VALUE**

The ares\_free\_data() function does not return a value.

# **AVAILABILITY**

This function was first introduced in c-ares version 1.7.0.

## **SEE ALSO**

 $ares\_get\_servers(3), \quad ares\_parse\_srv\_reply(3), \quad ares\_parse\_mx\_reply(3), \quad ares\_parse\_txt\_reply(3), \\ ares\_parse\_soa\_reply(3)$
